

**Cyber Incident
Incident Annex III
Colorado State Emergency Operations Plan**

LEAD AGENCY: Office of the Governor

SUPPORTING AGENCIES: All Agencies and Offices

I PURPOSE

The State of Colorado's Cyber Incident Annex was established to effectively address the need for the successful handling of, and response to, cyber security incidents. All cyber security incidents must be reported in accordance with policies and procedures established in the Colorado Cyber Security Program (CCSP).

II SCOPE

The CCSP requires participation from all Colorado public agencies and other users utilizing shared State resources including the Multi-Use Network (MNT) or shared data center. Participation is also required from all public agencies and service providers that operate critical state systems.

III SITUATION

An information security event usually results from man made technological cyber attack that produces damage and results in a large number of requests for services to mitigate the cyber attack. The state, when notified of an emergency situation at the state level, will monitor the situation and provide assistance as resourced.

IV CONCEPT OF OPERATIONS

- A. Cyber security incidents are identified and reported by the State public agencies. In response to an incident, the State public agencies involved in the response will assess the situation to identify any needs and requirements.
- B. Due to the sensitivity of cyber security, specific reporting, response, and recovery procedures are addressed elsewhere.

V ORGANIZATION and RESPONSIBILITIES

The Office of the Chief Information Security Officer (CISO) is responsible for implementing the State cyber security program.
